Product Designer

UI/UX & Marketing Design

DESCRIPTION

How often do you get the chance to make a permanent and visible global impact? Reconstruct is used to build new stadiums, hotels, dams, hospitals, and many other buildings, as well as inspect bridges, power plants, and other critical infrastructure. Customers are the most valuable asset of Reconstruct. We work very closely together with our customers and they inspire us to develop new and exciting product enhancements. We're looking for someone with a strong sense of aesthetics and a drive to simplify complex workflows.

RESPONSIBILITIES

1. Analyze how a new product ties in with our current product portfolio, the market needs and customer preferences.
2. Set design requirements based on briefs from internal teams and external partners.
3. Sketch userflows and produce prototypes that are used to gather feedback from our customers.
4. Create detailed user interfaces with documentation for designer to developer handoff.

QUALIFICATIONS

- Work experience as a Product Designer or similar role
- Bachelor's degree in Graphic Design / Computer Science / HCI or relevant field
- Experience with design programs (like Sketch, Zeplin, Marvel, inVision, Adobe CC)
- Self-starter, problem solver, can-do attitude
- Strong communicator
